HOW TO USE IT

1. Plug board into computer

Y. Try the board

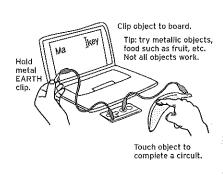

Your computer should think "space bar" was pressed. If not, try pressing more firmly or licking your finger.

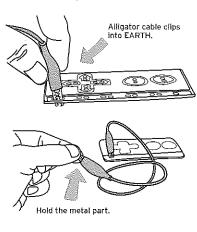

2. Close any pop-ups

5. Connect everyday objects

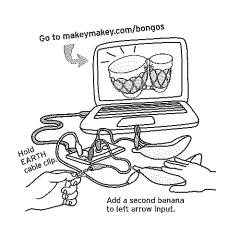

3. Connect yourself to EARTH

Tip: removing

cover makes cable easier to hold.

6. Make banana bongos!

When you touch bananas, computer thinks you're pressing space bar and left arrow key. At this web page, those keys make noise on the bongos!
